

NORTHERN SNAKEHEAD

THE FRANKENFISH

FIERCE PREDATOR

Can eat up to 33% of its body length in native smaller fish, larvae, beetles and frogs and has no natural competition

SURVIVAL OF THE FITTEST

This fearsome fish gets its nickname from the fact that it can live and breath out of water for up to 4 days!

IDENTIFY THE NORTHERN SNAKEHEAD

- Torpedo-shaped head with a mouth full of sharp teeth
- Body ranges from 17 cm to 2 m, covered in irregular brown and black splotches
